## SUGGESTIONS FOR USE:

All students can see a copy of the calendar.

Teacher gives a number and a month, and the students have to give the day of the week.

It could work other ways as well, with the teacher giving a day and a number and the students working out which month it is.

Students work in pairs, each one having a copy of the calendar.

Each student marks 10 dates on their calendar.

They take it in turns to tell each other the dates that they have marked, and their partner has to mark the correct dates on their calendar.
